

COMPACT

- VLAN management
- SD card slot on the back, for saving the configuration
- NAT (Network Address Translation) for Non-ProfiNet switches
- TIA portal integration via GSDML file for ProfiNet switches
- Fast Gigabit data transfer rate

XELITY IP20 MANAGED GIGABIT SWITCHES - INTELLIGENT NETWORKING

Switches perform central tasks in networks. As intelligent infrastructure components, they read incoming data and forward it to the port with the corresponding receiver.

Murrelektronik's IP20 Managed Switches allow Ethernet devices communicate with each other via network connections. They give the network the option of setting up different topologies, like star or tree. In addition, the switches can perform other tasks including error analysis or network diagnostics. They optimize data transmission and provide network control through remote access.

The ProfiNet connection in the switch and configuration tool integration (TIA Portal via a GSDML file) simplify installation. Equipped with the latest Gigabit technology, your network is ready to handle future increases in data volumes.

Our IP20 Managed Switches are available with or without ProfiNet, the open Industrial Ethernet standard for automation. ProfiNet uses TCP/IP and IT standards and enables the integration of fieldbus systems.

XELITY MANAGED IP20 SWITCHES

Description	Part-No.
Managed 4 Port Switch	58820
Managed 4 Port Switch with ProfiNet	58821

Description	Part-No.
Managed 6 Port Switch	58822
Managed 6 Port Switch with ProfiNet	58823

Description	Part-No.
Managed 8 Port Switch	58824
Managed 8 Port Switch with ProfiNet	58825

**MADE IN
GERMANY**

Xelity switches are produced at our Oppenweiler headquarters. This guarantees a high-quality product as we strive for a zero-defect strategy in all production areas. We are continually investing in machines, systems and quality control in order to further develop and improve our technical processes. Through supplier integration, robust processes and implementation of process optimization measures, we create the world-class, technologically advanced products you have come to know and love.

Visit our website, murrelektronik.com, or online shop, shop.murrelektronik.com, to learn more about our switches.
